

Gas Products

Viscount Rotational Mouldings Pty Ltd have a range of infrastructure products that suit the growing demand to bury gas meters and valve connections. Developed in conjunction with the Energy Authorities the range of pits and lockable lids cover most requirements. The larger G3 pit has options including a 240mm extension collar, removable shelf or the option of either the rotationally moulded class A lockable lid or the heavy duty reinforced class B lockable resin lid. All lids are supplied with keyhole security plugs to keep the lock stem free of foreign material and ready to use. The resin lids also have the option of a galvanized support frame that can be used in high traffic areas.

UG2031 - G1 Pit

UG2032 - G2 Pit

UG2033 - G3 Pit

Gas Products

These frames are generally cast into the concrete or bitumen pathway surface and prevent the load transfer to the pit itself. The lockable lids have load bearing capability from class A to class C and have a certified anti-slip surface profile. Whatever your requirement, Viscount have the safe option for restricted access to your control and metering equipment.
